Our programmes

One to One coaching

An individually tailored programme of coaching over a minimum of 6 weeks, designed to help you get really clear about where you are going and what it will be like when you get there.

In the sessions we will work with any issues you may bring, from self confidence to finding out what you really want from work and life. We do not come with ready made solutions. We work with capable adults who are in charge of their own destinies.

All our coaches are trained, accredited and members of the International Coaching Federation and or the Association of Coaching. The coaching packages are flexible to suit your requirements and availability. Coaching can be conducted on the phone or face to face and sessions may last from half an hour to 1½ hours. We are qualified to use a number of psychometric, behavioural and 360° tools to inform the coaching and enhance the process of self awareness, but will always discuss this with you when designing the coaching package.
